

Expenditure Reporting for Threatened and Endangered Species (TES) – TES Costs Template is Open for FY06 Project Expenditures

The TES Costs Template is open for reporting of FY06 TES expenditures. Access to the template is at <http://el.erdc.usace.army.mil/tessp/>, lower left navigation pane.

You may want to look at the FY05 expenditure reports for your District or Division.

Reporting for FY05, the Corps expended \$160M for compliance with the Endangered Species Act. Of that amount \$15.6 M was attributed to Environmental Stewardship.

One of the lessons of the FY05 reporting was that the expenditures at reservoir projects could be entered by the project folks, since this is where the expenditures take place. To make this happen, the input screens for the template have been revised to allow for project level reporting of expenditures; two steps are required.

1. Select "Operations – Environmental Stewardship – Project" from the Select a Function / Element menu.

A screenshot of a web form titled "Threatened & Endangered Species Expenditures Reporting - Costs Template". The header features the US Army Corps of Engineers logo on the left and a decorative border of animal icons. On the left side, there is a "TES Options" menu with a "Main Menu" link. The main content area is titled "Function / Element Information" and contains several input fields: "Select a Function / Element:" with a dropdown menu showing a list of options including "Operations - Environmental Stewardship - Project"; "If 'Operations - Environmental Stewardship' selected, enter Function name:" with a text input field; "If 'Other' selected, enter Function name:" with a text input field; and "District/Division:" with a dropdown menu showing "Alaska". A "Submit Information" button is located at the bottom of the form.

2. The project name is entered

Threatened & Endangered Species Expenditures Reporting - Costs Template

US Army Corps of Engineers

Function / Element Information

Select a Function / Element: Operations - Environmental Stewardship - Project

If "Operations - Environmental Stewardship - Project" selected, identify project name:

If "Other" selected, enter Function / Element:

District/Division: Alaska

After entering and submitting the data, the information can be viewed in the expenditure reports.
